PERSON PROFILE

Experienced Web Developer adept in all stages of advanced web development. (4+ years of production experience in highly available systems and serverless architectures). Knowledgeable in testing, debugging processes, installation, and maintenance of web systems (back and front end). Proficient in an assortment of technologies, including Python (2 and 3) and it's web frameworks (Flask, Django, DRF, Pyramid, Tornado), REST APIs, GraphQL, SOAP, VUEjs, VUEX, vanilla JS and learning Go (what a cool language!), AWS (Lambda, love it, EC2, S3, SQS, Dynamo, etc), MongoDB, DynamoDB, Redis and PostgreSQL. Also Travis CI, Docker, Bitbucket pipelines. Able to effectively self-manage during independent projects, as well as collaborate in a team setting. Besides that, a fast learner and an easy to translate complex concepts to simpler terms. My main focus at the moment is backend development!

EMPLOYMENT HISTORY

FullStack Developer at Anchorloans.com, Calabasas

January 2020

- General Front and back-end legacy systems maintenance (complex bug fixes, new features, refactoring, etc);
- APIs (server and client: REST, SOAP and GraphQL);
- Async programming (SQS, Celery), asyncio;
- Refactoring from py2 to py3;
- Participation in meetings with Business and BAs to help plan new features/services;
- Backend performance enhancement (detection of pain points, benchmarking, reducing processing time/amount, query times, page load, etc);

- Main accomplishments: an entire fullstack project with a 3 people team (me, a BA and a QA), participated since the planning to release, the project with less maintenance needed in the entire company (tech used: Flask, SQS, S3, EC2, Lambda, PostgreSQL, Vue, Vuex); solved complex authentication bug that seniors could't solve, in week and by myself. Also built from scratch a super file zipper, where users can just inform the loans control numbers (a list) and the code gathers all related files (more than 200 per loan), zips in individual folders and sends to the user personal Google Drive as well as an email informing job is completed. It already generated files with more than 10gb, no timeouts, no breaks.

- Tech stack: MongoDB, PostgreSQL, SQLAlchemy, Mongoengine, py2, py3, AWS Lambda, AWS S3, AWS SQS, GraphQL, Fast API, VUE, VUEX, Jquery, Vanilla JS, Bitbucket, Jira, Jenkins.

Freelancer Developer at Lojasparaguai.com.br, Iguassu Falls BR

October 2019 — January 2020

- Refactor of scraping bots from PHP to Python;
- Made with scrapy, beautiful soup and hosted on Digital Ocean.
- Infra cost reduction about 20%.

Product Owner/Python Developer at Frontur.tur.br, Iguassu Falls BR

January 2014 — October 2019

- support to the sales team on operational/commercial matters related to the company e-commerce;
- bug analysis/report to IT team, Jira board management;
- new opportunities and website enhancement based on latest statistics/user feedback/market surveys;
- Capacitation/presentation of the OTA features to the company stores (4 in Iguassu Falls, 1 in Paraguay);
- support on Customer Service team;
- contact and negotiation of commercial conditions with suppliers (tourism related and IT);
- analysis/control E-commerce Balance Sheet;
- Cost management and decisions;
- Planning with the Marketing and advertisement Team online advertisement campaigns;
- Analysis and approval of advertisement material;
- Implementation and control of online advertisement (Ad Words, BingAds, Facebook, etc);
- Analysis of KPIs and report on online advertising campaigns to directory and Marketing Team;
- Daily data analysis and online campaigns/advertisements tuning;
- Coordination AB tests;
- Familiar with methodologies: Agile (product owner) and Scrum
- Main accomplishments: designed and implemented from scratch a quotation control system for the agencies (where managers could see the quotations made by agents, monitor how they are going and if it converts in sales). Made with Django, Jinja2, JQuery, Digital Ocean, S3, Lambda and PostgreSQL. Also designed and implemented a landing page generator for Marketing Purposes, tech used: Django, Jinja2, JQuery, S3, Celery, Docker, PostgreSQL.
- Tech stack: Django, Jinja2, JQuery, Bootstrap4, DigitalOcean, S3, Lambda, PostgreSQL, Digital Ocean, Heroku, Trello.

Travel Consultant/Agent at Frontur.tur.br, Iguassu Falls BR

April 2010 — January 2014

- Air and hotel reservations (mainly corporate and luxury leisure travel - BR and overseas);
- Luxury travel packages (leisure mainly - BR and Overseas);
- Monthly sales around U\$ 80k, high customer satisfaction.

Freelancer Translator at Self, Iguassu Falls BR

January 2007 — January 2015

- Translation/revision/correction on web content (main areas: tourism/hotel websites; IT and consumer electronics manuals).
- The English to Portuguese translation for the Mitsubishi L200 GPS manual is mine, also many hotels around Brazil used my services (PT to EN) and in South America (mainly Argentina, ES to PT).

EDUCATION

- **Bachelor in Tourism Administration, Universidade Estadual do Oeste do Paraná, Iguassu Falls BR**
January 2000 — January 2005
Final note: 9,6. My final project was about the IT system used in Iguassu National Reserve to monitor tourists. Analysis of the system architecture and improvements/suggestions that could be done to increase the info input from tourists and learn more about their behavior inside the reserve.
